

PhD Day 2019: Company speed dating

Session from 13:00 – 15:00

Companies

2021.AI

2021.AI was founded in Copenhagen in late 2016 and has grown to a strong team of over 80 passionate individuals serving more than 30 clients globally. We are an AI technology company providing everything from AI strategy to full implementation of our Grace AI Platform.

Our team is a combination of world class experts in advanced technologies, AI and Machine Learning, along with senior profiles experiences from leading technology companies and entrepreneurial success from establishment to exits.

ACCENTURE

Accenture is a leading global professional services company, providing a broad range of services and solutions in strategy, consulting, digital, technology and operations. We partner with more than threequarters of the Fortune Global 500, driving innovation on a global scale.

With expertise across more than 40 industries and all business functions, we deliver transformational outcomes for a demanding new digital world. With more than 470,000 people serving clients in more than 120 countries, Accenture drives innovation to improve the way the world works and lives.

AGILENT TECHNOLOGIES

Agilent traces its history to the 1960's in the heart of Silicon Valley when, as Hewlett-Packard, Agilent entered the analytical chemistry market. Since then, we have been a global catalyst for the advancement of science and technology in life sciences, genomics, research and pathology. Agilent operates in over 110 countries with more than 15,000 employees. Every day our employees make an impact by enhancing customer outcomes in their work to improve the quality of our air, water and soil, conduct ground-breaking Nobel Prize research, and increase the precision of cancer diagnoses and targeted treatments for patients.

Join our passionate team and help us provide the right innovations, solutions expertise and services to enable our customers to gain the answers and insights they seek ---- so they can do what they do best: improve the world around us. By joining our site in Glostrup (Copenhagen/Denmark), you become part of a dedicated international team on a mission to inspire discoveries for a better world. For our opportunities in Denmark, Europe, and globally: www.agilent.com/go/careers.

ARLA

With a vision to create the future of dairy, and make healthy, natural dairy products for millions of people around the world, there's plenty to keep you motivated, challenged and continually developing here at Arla.

We're the farmer-owned dairy cooperative behind global brands Arla®, Lurpak® and Castello® and our 19,000-strong team of passionate people have helped us become the fifth largest dairy company in the world and the largest producer of organic dairy products.

We've got a high performing culture and we have great ambitions. We've got a strong strategy for growing our business and one for growing our colleagues too. So, if a dynamic environment where change is an everyday occurrence appeals to you, discover more about our business, immerse yourself in Arla life and see what opportunities we have available.

BAYER NORDIC

Bayer is a Life Science company with a more than 150-year history and core competencies in the areas of health care and agriculture. With our innovative products, we are contributing to finding solutions to some of the major challenges of our time. With life expectancy continuing to rise, we improve quality of life for a growing population by focusing our research and development activities on preventing, alleviating and treating diseases.

We are also committed to developing innovative products and solutions to benefit farmers, people, and our planet by making an important contribution to providing a reliable supply of high-quality food, feed and plant-based raw materials to help feed the growing global population - one of the greatest challenges facing the world.

Advancing life - that's what Bayer is all about

CARLSBERG RESEARCH LABORATORY

"The principal task of The Carlsberg Laboratory shall be to develop as complete a scientific basis as possible for malting, brewing and fermenting operations." - J.C. Jacobsen, founder of Carlsberg

Committed to Research & Groundbreaking Discoveries

J.C. Jacobsen was a strong believer in the power of science. In 1876, he established the Carlsberg Research Laboratory and brought together some of the greatest scientist of the time.

Today, Carlsberg Research Laboratory's interdisciplinary teams with expertise in brewing science, chemistry, biochemistry, physiology, genetics, bioinformatics and molecular biology work together to further perfect the art of brewing.

Carlsberg Research Laboratory is an integral part of the Carlsberg Group and Carlsberg Foundation family.

CHR HANSEN A/S

At Chr Hansen, we work to improve food and health, and our natural ingredients are consumed by more than 1 billion people every day. As a global market leader in bioscience, we have the opportunity to address important global challenges such as food waste, healthy living, sustainable agriculture. We develop and produce cultures, enzymes, probiotics and natural colors for a rich variety of foods, confectionery, beverages, dietary supplements as well as even animal feed and plant protection. Our product innovation is based on more than 30,000 microbial strains.

We believe that engagement matters. Every one of our 32 global offices offer an agile organization proud to promote an inspiring work environment and a collaborative culture with the passion to make a difference.

CP KELCO

CP Kelco produces food ingredients, which are used to improve texture, consistency, and stability in food products, as well as in pharmaceutical and industrial products. Headquartered in Atlanta, Georgia, USA, CP Kelco is a leading producer of specialty hydrocolloids with offices and facilities across the globe. Featuring an extensive range of specialty hydrocolloid solutions, CP Kelco leverages its capabilities to bring concepts and ideas to real-world products in a broad range of applications.

Serving over 100 countries, CP Kelco established the quality and safety standards the industry is measured against. CP Kelco ingredients touch a wide variety of industrial applications, consumer and household products, tailored to meet the needs of regional consumers. Key product lines are Gellan Gum, Pectin, Cellulose Gum, Xanthan Gum, Carrageenan, Carboxymethyl Cellulose, Diutan Gum and Microparticulated Whey Protein Concentrate, as well as other unique biopolymers.

We produce BioGums and FoodGums for use in e.g. marmalade, fruit and milk drinks, confectionery, and bakery. We offer a dynamic and international workplace with high focus on safety, and we pay respect to the individual.

CP Kelco's Danish department is located nearby Køge and is one of the biggest production companies within the food- and process industry.

FOSS ANALYTICAL

A fast growing population means that the global food production will have to increase by 60 % by 2050 to meet demand. Therefore, we need to find smarter ways to make the best use of agricultural resources and to eliminate food waste.

FOSS is the world's leading producer of analytical instruments that monitor and control food quality, with the expertise to help companies address these global trends and turn them into opportunities – in a way where sustainability and good business go hand in hand.

FOSS solutions are based on extensive use of optics and provide a wealth of data and therefore contain sophisticated data analysis algorithms. Hence, we have large teams of skilled physicists, data scientists/chemometricians and software developers implementing these methods and

technologies. The goal is to keep solutions simple and easy to use for customers, who should not worry about complicated optics or mathematics. That's our job.

FOSS was founded in 1956, and is headquartered in Hillerød north of Copenhagen. FOSS is a global workplace with research, development, production, and sales taking place around the world. FOSS employs around 1,500 employees worldwide.

HALFSPACE.IO

INVIXIO

INVIXIO Consulting Group is an agile and innovative consulting company with an international footprint undergoing significant growth within all business areas, serving private as well as public customers.

Change and disruption is the norm in most industries. Elements such as innovation, creativity and agility combined with flexible internal company structures and systems are on all senior management's agenda. An agenda that INVIXIO embed in the way we work with our customers to create value.

Our key areas of expertise are Transformation, Digitalization, Compliance and IT-Security – combined with an embedded change mindset, it enables us to make a real difference for our customers.

INVIXIO has a unique way of working internally, which is reflected in our way of doing business with our customers. NOVO NORDISK

Novo Nordisk is a successful global pharmaceutical company and a world leader in diabetes care. Novo Nordisk also holds a leading position within areas such as obesity, haemostasis management, growth hormone therapy and hormone replacement therapy.

At the Ph.D career event, Novo Nordisk will be represented by a Biostatistician and a Statistical Programmer from Biostatistics and a Regulatory Affairs Graduate from Regulatory Affairs.

For the Biostatistician, planning and coordination of statistical activities is a central part of the job. This involves giving input to the design, sample size and statistical methodology of our clinical trials, to conduct the statistical analyses and interpret the results, and to develop the statistical scientific documentation going into regulatory files. The Biostatistician has an educational background within Statistics.

The focus of the Statistical Programmer is to turn complex data into clearly organised reports providing insights and recommendation for scientist colleagues. The Statistical Programmer coordinate and conduct programming tasks related to clinical trials, summaries, health authority interactions and publications. The Statistical Programmer has an educational background within Natural Science (e.g. biology, physics, etc).

Regulatory Affairs secures the approval of new products and drug indications, making it possible for the company to bring innovative products to patients. Regulatory Affairs is responsible for project planning and execution from the earliest stages of drug development all the way through life

cycle management of marketed products. The Regulatory Affairs professional has a Scientific or Life Sciences degree.

In Novo Nordisk we also offer Graduate Programmes in several areas. The 2-year programme consists of three 8-month rotations; two rotations in our headquarters in Denmark and one rotation in one of our global affiliates. The rotations are shaped to meet our business requirements and needs, but will also focus on your personal and professional development, accelerated by prioritised training and dedicated coaching from experienced colleagues

NOVOZYMES A/S

Novozymes is a Danish biotech company and a global leader within the development of enzymes and microorganism for industrial applications. With 48% market share in industrial enzymes, Novozymes deliver bioinnovation to 130 countries and manufacture across North America, South America, Europe and Asia. Novozymes employs more than 6.000 people and have since 2000, brought more than 100 new molecules to market to address specific industry and customer challenges. The major industries are e.g. detergent, feed, food and biofuel.

Novozymes has a large focus on innovation and account for 2/3 of the entire global investment in developing enzymes, and dedicate 13-14% of the total revenue to R&D. In Science Magazine's global Top Employer Survey, Novozymes has ranked top 10 for three years running and in Novozymes you can find your niche, whether you're interested in making ground-breaking scientific discoveries or delivering the right quality at the right time to our customers:

RAMBØLL

Become a Sustainable Society Consultant!

Ramboll is a leading engineering, design and consultancy company. Working at one of our 300 offices in 35 countries you will join 15,000 fellow bright minds in creating innovative and sustainable solutions within Buildings, Transport, Energy, Environment & Health, Water and Management Consulting. When you work for Ramboll, you're working for a company that creates sustainable change - not just for society, but for our employees too.

Your growth is central to our success.

As you work on challenging projects, you will be given increasing responsibility – while also being able to rely on experienced managers and colleagues to offer support and a helping hand as you learn and develop in your role. With us you are encouraged to collaborate with your colleagues in a friendly and flexible work environment. We always work from the highest ethical standards, and we strive to do right in everything we do – by people, by society and by the environment. From day one, we trust and expect you to take responsibility and make decisions you can be proud of.

INVENTOR ADVISORY SERVICE (IAS) at the Danish Technological Institute

Each year the Inventor Advisory Service helps thousands of Danes explore their ideas, with the aim of turning these ideas into validated, commercializable inventions, products and services. Our advisory services are free, independent, confidential and offered as a means of help-to-self-help. Our methodology is very hands-on and practical and as an inventor you play a very important role as you will be wholly immersed in the 'advisory' process. We rely on your willingness to collaborate and persistence in gathering necessary and valuable insights needed for your ideas and/or inventions to succeed.

Do you have a great idea or invention you would like to bring to life? Are you looking for strong, practical sparring and guidance during the process? Then meet us at the PhD Day 2019 in IDA og send us a description of your ideas or inventions. We look forward to hearing from you.

WUNDERMAN NORDIC

Do you have strong analytical skills? Are you passionate about Machine Learning and Advanced Analytics? Would you like an exciting job with plenty of opportunity to grow? Then you might be just the one we are looking for!
